Recommendation	Issue it Resolves	Status
Define Natural Wood Waste	Reference:	
Facilities as those facilities requiring	http://www.mde.state.md.us/programs/Permits/Documents/2008permitguide/WAS/2.04.pdf	
an NWWRF permit from MDE or		
facilities conducting similar	This document indicates that the key differentiator is whether the facility markets recycled	
operations.	wood waste, sic, "A natural wood waste recycling facility DOES NOT include a collection or	
	processing facility operated by a nonprofit or government organization located in the state, or	
Thus, when agricultural properties	single individual or business that provides recycling services solely for it's employees or for it's	
recycle wood waste for their own	own recyclable materials generated on its own premises."	
use, no NWWRF permit is required.		
No quantitative restrictions apply		
for conditional use approval when		
recycled wood waste is used on		
premises or by it's employees.		
Though additional requirements as		
currently exist may still apply for		
conditional use.		

Ag Pres properties should be eligible for a wood waste recycling exception as long as the fundamental business of farming is maintained. a. More than 50% of waste material must originate on the Preservation Property during each year of operation. [MALPP] b. Wholesale/retail sale of recycled material shall not exceed the annual revenue generated by the farming activity. [The highest revenue of the farming activity's last 5 years may be used.] NWWRF that market less than 2,000 tons per year may obtain CU approval on RC, M1 and M2 zoned properties. Reference MALPP Fact Sheet 1 "You voluntarily sell your right in perpetuity to develop your farm for residential, commercial or industrial use." Some exceptions have been made, e.g., barber shops, kennels, etc The underlying assumption is that "the exception" will not fundamentally change the use of the property from farming to "the exception" The underlying assumption is that "the exception" will not fundamentally change the use of the property from farming to "the exception" The underlying assumption is that "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the exception" The underlying assumption is that "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the exception" The underlying assumption is that "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the exception" will not fundamentally change the use of the property from farming to "the	Recommendation	Issue it Resolves	Status
